Theme drinks

Monday 14-01-2019
Committee Night

Dear reader,

Last week, we celebrated the fourth birthday of the association with our dies week. This busy, but fun week was marked by the beerpong tournament and the dies party, amongst others. In the final few weeks of the year, we will have not one, but two lunch lectures! You can read more about the lunch lectures below. Keep in mind though, that you have to register for these lunch lectures so we can prepare enough lunch for everyone. Then, in the new year, we will start out with the first theme drinks of the (academic) year. If you have a good idea about a theme for the next theme drinks, you can find out more on [the hooke website](#).

As you will have undoubtedly noticed, the format of the member mail is back into its original state, with slight modifications. This format should be more stable across different devices and mailboxes, but if you do have any trouble, the member mail is also visible on the Hooke website under the "contact" tab in the top menu.

Education HOKa funds

The government has a bag of money which they would like to spend on innovative projects which improve education at the universities. For the EMC, students are asked to give input for these projects. If the idea is considered good, the money will be provided for our programme. An example for such a project is more student TA's, to adapt the courses to the students' wishes and help the teacher with projects. But it can also be something that is not directly study related, like mindfulness courses or diversity improving projects. You are welcomed to think outside the box. Do you have an idea for an innovative project? Please let your [Commissioner of Education](#) or Claire know. Your input is appreciated!

Career Enpicom Lunch Lecture

On Tuesday the 18th of December Nicola Bonzanni, the CSO of ENPICOM, will give a lunch lecture about his work as a bioinformatician and software engineer at ENPICOM. ENPICOM is a company in 's Hertogenbosch specialised in bioinformatics and immunogenomics. They are

focused on immunology, oncology and haematology and their powerful analysis software provides deep immune system understanding at a glance. ENPICOM build helpful software for challenging and high-impact biology applications and they offer plenty of opportunities with regards to internships and a future career. Interested? Come to the Watermanzaal in the Applied Sciences building (B.58) between 12:45 and 13:45. As usual, free lunch will be available.

Are you the next board?

Even though we're not even halfway through the year, it is important for us, the board, to think about our replacement for next year. Yesterday, an information flyer was sent around on various media. If you're thinking of doing a board year, please refer to that flyer for more information, or contact the board if you've got more questions!

Social
Exon

Get hyped! This year, the first members weekend of S.V.N.B. Hooke will be held on **May 3-5**. Think of IntroN, but not IntroN: no "nemos" or "zeros". A weekend for everyone to enjoy. More information will follow, but save the date!

Theme drinks

On the previous General Assembly, Aidan Purugganan's idea for the theme drinks was voted the winner of the first theme drinks competition. He'll now get to organise the "As a high energy Neutrino to the Hooke Casino!" drinks on Tuesday 8 January in Bar het Lab. The bar will be opened from 16:30-21:30.

With small regards,

Brian Analikwu,
Secretary of the Board '18/'19
